The new MRI and MicroCT Preclinical Facility in Pavia Opening Conference

Thursday, 27 February 2020, 14-18
Aula Harvey, Polo Botta 2, Via Ferrata 9, Pavia

The new Imaging Facility of the University of Pavia equipped with a 7 Tesla Magnetic Resonance Imaging (MRI) tomograph and a high resolution X-Ray Computed Tomography (CT) scanner officially starts its activity. This Opening Event aims at celebrating the major breakthroughs achieved *in vivo* in recent years by means of these techniques and at stimulating new contacts and collaborations across the research community of Pavia and beyond.

Invited speakers:

Fabio Tedoldi (Bracco Imaging)

Bjorn Busse (University Medical Center Hamburg)

Angelo Bifone (University of Turin)

Simone Cenci (San Raffaele Scientific Institute
& Università Vita-Salute San Raffaele)

Dominik Von Elverfeldt (Universitätsklinikum Freiburg)

Guided visit to the lab after the talks

*The Conference is Organized in the framework of the Inauguration of the
UniPV PASS-BioMed facilities <https://tinyurl.com/PV-PassBioMed>*

Free Participation

Sponsored by
